Henry Lindner, MD

Contract and Fees

Dr. Lindner does not provide any primary, urgent, or emergent medical care. All patients must retain their own primary care provider. For any significant after-hours medical problems, patients must contact their primary care doctor or go to an emergency room. Dr. Lindner is available by phone only during business hours on M-T-W-F. He will answer all e-mails within 24hrs.

An in-office consultation is required at least once every year to renew prescription hormone therapy, except in unusual circumstances. A phone or office consult is required to renew prescriptions, so patients should perform testing on or soon after the date specified by Dr. Lindner to avoid needing late refills. There is a \$10 charge for late refills prior to an appointment.

Basic Fee: **\$6 per minute** for consultation and documentation time

Office Consultations 20 minutes or less, minimum charge	\$120
30 minutes	\$180
45 minutes	\$270
1 hour	\$360

Phone Consultations (Charge includes talk time and post-call documentation time)
For 10 minutes or less, minimum charge **\$60**

For >10 minutes charged at \$6/min, same cost as for office consultations
E-mail Consultations (info. or advice not requiring other actions) **Free**

E-mail including prescription or laboratory test request **\$20**

Consultation by e-mail (Symptom and lab review, prescription, lab request) **\$30--\$60**

Prescription Refills and Laboratory and Requests (handled by clinic staff) **\$10**

(All interim charges are added to the patient's account, to be paid at the next phone or office consultation.)

Formal Letters and Reports **\$180**

Prices are subject to change without notice. The above fee schedule does not include costs for lab tests, hormones, or supplements, which the patient will purchase directly from the vendors. Dr. Lindner does not bill insurance for consultation fees and does not participate in Medicare, Medicaid or any insurance plans. Patients may submit paid invoices to their medical insurance, but not all will reimburse for services provided by a non-participating physician. Lab tests and hormones may be covered by insurance if a recognized disorder exists as per ICD-9 and the insurer agrees that the test or prescription is necessary. Medicare or insurers may refuse to cover some tests.

I understand that I am responsible for Dr. Lindner's fees. I am also responsible for determining whether labwork will be covered by my insurance before undergoing testing ordered by Dr. Lindner.
